FH JOANNEUM

For all businesses, using and applying newly developed communication technologies is to become a core element in their economic areas; the managing and handling of information will become a necessary part of economic action. The FH JOANNEUM is one of Austria's leading Universities of Applied Science and hosts several different study courses, ranging from social management to information design.

Degree Programme Information Management

Amongst other things, the key areas of excellence of the degree programme Information Management are:

- fundamental scientific principles: e.g. mathematics, information sciences, method knowledge, media psychology
- information and communication technologies: e.g. desktop applications, operating systems, network technologies, programming and system management, digital media
- information and organisation systems: e.g. databases, information management, business management, change management, integrated information systems
- economics and social sciences: accounting, controlling, marketing, project management, quality management
- English, internship and diploma thesis
